Experience

- 6/17 - Now **Software Engineer** [Everest Re Group](#)
Everest is a top-tier global (RE)insurance organization.
- Built a Messaging solution which serves as an intermediary between the company and external brokers. Lauded as the 'backbone' of the business.
 - Engineered systems to maintain, optimize, and iterate upon the primary application which drives the business.
 - Developed innumerable POCs to kick-start several technological modernization projects.
 - Won 3 awards for my contributions, becoming the 'biggest winner,' in an annual colleague-nominated recognition event.
- 5/16 - 6/17 **Associate Software Developer** [Wakefern Food Corp.](#)
Wakefern is a retailer's cooperative, the largest in the United States.
- Built the complete server architecture to remotely manage cash registers via PC and mobile clients, reducing front-end expense.
 - Composed software to broadcast & track mass alerts to accelerate incident response and greatly diminish call charges.
 - Constructed a ticket application which enables rapid reporting of hardware and software issues and mitigates costly user error.

Education

- 2013 - 2017 **Bachelor's Degree in Computer Science** [Kean University](#)
HackKean II 1st place winner.
2016-17 Who's who among students awardee.
Umpteen time Dean's list recipient.

Personal Projects

- Homi, Home Assistant**
Hackathon winning project, regulates AC via infrared transmitting raspberry pi controlled with smart phone or watch. Built with C, Python, and Java.
- Pebble Cruise Pal**
Smartwatch based navigation helper.

Leadership & Service

- 2017 - Now **Founder** [Everest Early Talent Group](#)
Founded a meetup group to aggregate on-boarding information, establish peer to peer networking, and foster a mentorship driven cooperative culture.
- 2015 - 2017 **President** [Association for Computing Machinery](#)
Organized events to connect students with industry professionals. Created, hosted, and arranged workshops to develop skills outside the classroom.
- 2014 - 2017 **Founder** [Code Samurai](#)
Established, managed, and tutored within this volunteer group designed to teach CS fundamentals and advanced concepts to undergraduates.
